- Unity Essentials Pathway

Education

B.S. Computer Engineer

Bulacan State University
2020-2024
Bulacan, Philippines

Career Objective

With a year of experience in client-facing web design, I'm seeking a role that bridges creative design and technical development. My background with international clients has sharpened my eye for aesthetics and professional communication. I'm eager to build polished, functional interfaces using a documentation-first approach and modern libraries, merging visual creativity with a growing technical toolkit.

Work Experience

Web Designer - Senior Analyst — Jan 2025 - Present

Eclerx

- Provide real-time design and technical support using the Duda Website Editor to execute quick, high-quality site modifications for international e-commerce and CRM platforms.
- Collaborate directly with diverse clients to bridge the gap between their vision and technical implementation, managing account workflows through Salesforce CRM to ensure polished and functional results.

Feature Projects

Bulakenyo Spots

Discovery Platform

- **Frontend**: Developed a responsive, mobile-first UI using React and Bootstrap.
- **Backend**: Managed a dynamic database using MongoDB and Node.js to handle community-submitted content.
- **Objective**: Created a centralized hub to promote local tourism and community engagement.

React + Tailwind Portfolio

Website Portfolio

- **Frontend**: Built using React and Tailwind CSS for a modern, responsive layout.
- **Efficiency**: Integrated various front-end libraries to streamline development and preferred site functionality.
- **Deployment**: Managed continuous deployment through Vercel for optimal performance and accessibility.
