PROFESSIONAL EXPERIENCE

eClerx | Web Designer - Senior Analyst (Website Support & Client Solutions)
January 2025 – Present

- Provide real-time website design, content, and technical support for international clients using the Duda Website Editor.
- Translate client requirements into responsive website layouts, content updates, styling changes, and functional web solutions.
- Implement HTML, CSS, and JavaScript modifications while troubleshooting website issues and maintaining brand and design standards.
- Manage client requests, ticket documentation, and account workflows through Salesforce CRM while collaborating directly with clients.

KEY PROJECTS

Bulakenyo Spots – Discovery Platform

Visit Website

- Developed and deployed a responsive full-stack web platform for discovering local businesses, destinations, and community spots.
- Built React-based interfaces with responsive layouts and reusable UI components for desktop and mobile users.
- Developed RESTful backend functionality using Node.js and Express.js with MongoDB for dynamic content and data management.
- Integrated Cloudinary for image management and MapTiler for location-based functionality.
- Deployed the application using Render and managed source code through GitHub.

Personal Web Portfolio

Visit Website

- Designed and developed a responsive personal portfolio to showcase web design, development projects, technical skills, and certifications.
- Implemented reusable React components, responsive layouts, interactive UI elements, and modern visual styling using Tailwind CSS.
- Managed source control with GitHub and deployed the production website through Vercel.
